ABOUT & MOTIVE

Still blown by my tiny experience of nordic culture in Stockholm, I kept a desire to widen the experience. Being myself a Jazz music affectionado, I stumbled upon the DR P8 Jazz radio station about a year ago and discovered the wide and extensive Jazz scene in Copenhagen. This and some urbanism talks got myself very curious of the life in Zealand. I am not familiar with the pharmaceutical industry and quite Junior, I saw your job offers last week but missed the Junior Data Integration role deadline. I then reread this one offer and it seemed to me that it is very close to my current role. I understand that you are looking for a 'Data Guy' to streamline data recollection within a wide legacy environnement and a big heterogen school of users. Managing both High-End Specialists egos and heavy technical debts. I'm doing this right now and it's pretty fun.

EXPERIENCE

- **Sipartech** Toulouse, France
Data Analyst Feb 2025 – Present
Creation of a position among the GIS team. Goal of facilitating data management for the Pre-sales team.
 - **Pre-sales Quotation Generator:** Updated the .xslm worksheets handling pre-sales quotations according to infrastructure PM's experiences. Refactored and improved VBA macros robustness. Halved the 4000 lines legacy code. Heavily simplified output readability.
 - **QGIS Plugins:** Built a .kmz generator to GAFAM clients topological standard. Added Simplex Noise for privacy. Automated DICT/ATU utility response workflows, completely replacing Sogelink and saving the company €40k/year in software licensing.
 - **MC80a Home One & Tydirium:** Architected an end-to-end multi-layer routing and pricing ecosystem, version controlled and scalable (git / docker) to unify and simplify buisness processes. Built a REST-like API (FastAPI / PostGIS) backend, a PyQGIS plugin front for Pre-sales team, and endpoint documentation (pydantic) for IT departement (Dolibarr). Replaced legacy VBA macros and local pg.routing implementation with a server-side SQL routing and pricing engine (PL/pgSQL). Established an ELT pipeline (dbt + Oracle FDW) for live data sync. Added vizualisation tools (pg_tileserv).
- **Sabbatical** Mont-Saint-Michel, France
Spiritual Retreat Mar 2023 – Dec 2024
With my technical abilities highly validated, I took time to better anchor myself and deepen my life experience.
 - **Personal Introspection:** Dove into family history, gathered testimonies and knowledge on my cultural heritage.
 - **Spiritual Journey:** Begun my spiritual education within the Community of Saint Martin in Mont-Saint-Michel.
- **SNCF** Lyon, France
Data Integration Intern Apr 2022 – Sept 2022
Among SNCF regional head management, contributed to a €30M project replacing legacy railway planning tools.
 - **Data Transformation:** Developped regex data collection tools and CSV modules for the Hastus system.
 - **Workflow Optimization:** Delivered and cleaned trial data for Knowledge Engineers on the validation process.

EDUCATION

- **University of Caen Normandy** Normandy, France
Master of Science in Applied Mathematics, Statistics and Decision Analysis 2019 – 2022
- **University of Caen Normandy** Normandy, France
Bachelor of Science in General Mathematics 2016 – 2019

MISC & PROJECTS

- **Spiritual:** Ongoing exploration of different Catholics and Christians communities since 2022.
- **Hostel Host in Sweden:** Lived a few mounths in Stockholm during spring and summer 2021.
- **Mathematics Teacher:** Got employed by a local high school during my last bachelor year in 2019.
- **Offshore Yacht Skipper:** Taught basics of sailing to crews of 6 to 9 teens and adults in Southern France.
